Assignment Day 5

- **Q.1** How do you list the process tree?
- **Q.2** What does `pgrep` do?
- **Q.3** Write a command to kill a process using its name without using killall (Hint: Use pgrep and piping)
- **Q.4** What is the difference between pkill and kill?
- **Q.5** Write a command to change ownership of a file.
- **Q.6** What permissions does the number code 764 result in? Write in `r--r--r--` format.
- **Q.7** What does `chmod` stand for?
- **Q.8** How would you assign permissions for a file without using numbers but symbols?
- **Q.9** What does the `d` in `drwx-r--r--` stand for?
- **Q.10** What is the difference between absolute and symbolic methods when assigning permissions for a file or a directory?
- **Q.11** Write a number code for the following permission: `rwx-r-x---`
